- HTML5
- CSS3
- ReactJS
- Angular
- MongoDB
- Node.JS

PORTFOLIO PROJECTS

Chat App | <https://bit.ly/Git-ChatApp>

A chat application that I created with React Native, and it relates to Firebase (Google). With this application you can send messages, take photos and upload images. You can also share your location through Google.

EDUCATION

Frontend Developer Program | Brainnest

APR 2023 – CURRENT

Internship training course program to devolve my skills as a Front-end Developer

Meta Front-End Developer Professional Certificate | Coursera

MAR 2023 – CURRENT

A program to further enrich my skills as a Front-end Developer

Full-Stack Developer | CareerFoundry

FEB 2022 – OCT 2022

Took a full course as a Full-Stack Developer at CareerFoundry and here I learned how to program with HTML, CSS, React. I learned a lot and especially on how to create project and built them, so they are ready for experience in the working sector.

Figma Course for UI/UX: Master Web design in Figma | Udemys

NOV 2022 – JAN 2023

This is a course on Figma, and it focuses on Front-End. Especially with UI/UX and understand designing a website.

EXPERIENCE

Fitter | JG Ventilation

FEB-2021 – CURRENT

Current employment. Very good for building characteristics such as taking independent action and solve complex problems. Knowing how much material to use and the plan doesn't fit with reality and have good communication with other people on how to solve these for the best quality result.
